

ZIMMER+ROHDE

Product data sheet

Paradise interpreted as lush foliage that stands vividly in space through a two-colour interplay of background and foreground. The all-over motif was digitally printed with a GOTS-certified reactive ink onto a cotton base produced in the Better Cotton Initiative (BCI) programme, which requires neither pre-treatment nor post-treatment. This innovative technology from our traditional textile printer in the North of England is not only water and energy efficient, but also produces particularly high light fastness and durability results.
